Dante,

Any word on the technical review?

Hey Jack,

I am working my way through the tech memo and Ken Greene is as well. I will be done today or tomorrow, and Ken's guy will be done with his review by Friday. Let's say I'll be able to give you our technical opinion by end of the day Friday. I'm thinking I can give you the preliminary OK then, assuming we agree with your technical analysis, and you could begin preliminary preparation while I work through my management to get the final ok. How does that sound?

Dante Rodriguez

Subject: Yerington Enhanced Evaporation

Dante,

Any word on when EPA plans to give the go-ahead on the enhanced evaporation at Yerington?
We are on hold pending EPA approval, but my consultants are chomping at the bit to get started
to take the most advantage of this warm weather we are having.

Any updates are appreciated.

Thanks,

-jack
